

GREEN COFFEE INNOVATION

# Hartmann Lemon

Geisha Natural

The farms of Finca Hartmann are located in the picturesque region of Santa Clara and provide a buffer for the International Friendship Park close to the Talamanca Mountain Range. Each variety is produced under shade and sustainably cultivated without the use of pesticides. All cleaning is done by hand and any cherries that do not meet Hartmann's quality standards are used as organic fertilizers on the crop. Hartmann employs the native people of the NOBES tribes to help him produce this exceptional coffee.

## **The Cup: 89 pts.**

Lemon, tropical fruit, coffee blossom, citric acidity, jasmine.
